

Noorderhoek Sneek (NL)

Renewal plan with durable rental houses

This project is a collaboration between housing association de Wieren and Elkien. Within this renewal plan 134 houses make room for 100 new rental houses. All those new houses will be connected to 'Waterschoon', a durable and innovative project. This is a small-scale system for water treatment and energy production in the middle of the district.

More information can be found on www.waterschoon.nl

Contribution Henco

The department Underfloor heating Henco has foreseen a complete plan with calculations for this project. Therefore the installer was able to work in a quick and efficient way, until 4 houses a day.

Partner Henco

Wholesaler Dyka has developed a container, DYKAMAG, which was equipped with an elaborate range of Henco products necessary for this project.
